(Hong-Kong Sector)

The first round of MV Seminars were conducted in Taiwan and Singapore in the month April 2006 by Bro. Bhaktaviirya and they were a great success from all perspectives. More than 30 margiis attended seminars in Taipei which continued over 4 consecutive evenings. It was a remarkable show of stamina for the trainer as well as participants.

Brother Vijay did a wonderful job of interpreting - very difficult -because Bro. Bhaktaviirya had trouble expressing the abstract ideas of MV in English. Translating into Chinese is doubly difficult. But all margiis seemed to enjoy the challenge.

The topics covered in the seminars are listed below. All presentations were accompanied by informative PowerPoint slides.

1) MV and the origin of life

In trying to understand the origin of life, some scientists are

suggesting mechanisms that hint at elements of microvita theory. This session introduced modern theories of the origin of life and how they connect to MV theory.

2) MV and Brahmachakra

Some suggested that Brahmachakra (BC) philosophy was now outmoded and to be replaced by MV science. This session focused at the relationship between MV and BC. The conclusion was that BC is alive and well!

3) MV, health and society

MV theory also has implications for personal and social health. It even has implications for economics.

4) MV and Tantra

MV brings many elements of traditional Tantra into the mainstream and introduces a science of mind.

5) MV and future of science MV theory has big implications

for the future of western science as it is currently practiced. In particular the dogma of monistic materialism is challenged. Nevertheless the essential empirical components of western science remain.

Furthermore the Taiwanese margiis have a wonderful sense of hospitality so the trainer felt very comfortable and at home the whole time he was there.

A one day seminar was conducted in Singapore again with 30 margiis and this time four WTs were also present. English language was used here, so what took 10 hours to cover in Taipei took 5 hours in Singapore.

As it was mentioned to the margiis in both places, it is believed that the East and SE Asian countries are in the best position to progress MV science. (...on Page 2)

Neo-ethics of Multilateral Salvation ...Shrii P.R. Sarkar

Until now scientists were under the impression that no structure can come into being without carbonic fundaments; that is, the survival, multiplication and decaying of any structure is not possible without carbonic locus standii. Carbons and non-carbons both get their atomic structure from Microvita. Microvita requires space in theory, but not in the realm of physicality. A carbonic framework requires space both in theory and practice. Microvita is not of carbonic origin.

Let us consider the case of the structure of a carbon atom. An atom has a nucleus around which electrons revolve. The weight of an atom is decided by the mass of its nucleus. The difference between two atoms is mainly one of nuclear difference. In this respect, the mass of the satellites is of little importance. If the nucleus of an atom is split up, tremendous energy or calories will surely be released.

It is true that every protozoic structure is based on carbon atoms. A single Microvita is insufficient to form one carbon atom, but when billions of microvita get solidified, a carbon atom is formed -- generally or naturally of heterogeneous nature, and under special circumstances of homogenous nature. Singularity or plurality of atoms constitutes one molecule and many molecules acquire the status of an element, either elements of homogenous nature -- hydrogen, carbon, helium, etc. -- or elements of heterogeneous nature -- hydrogen monoxide, hydrogen peroxide, carbon monoxide, carbon dioxide, etc. An atom may be internally of both homogenous and heterogeneous character and also externally of both homogenous and heterogeneous character. (...Continued on page 4)

Seminars...A success story !

That is because they sit on the boundary between the strongest objective scientific culture in the world (ie USA) and the strongest spiritual culture in the world i.e. the Indian sub-continent. MV science will require a synthesis of both cultural approaches.

He also spoke at the university in Taiwan to a group of 15 graduate students and lecturers about MV and philosophy of science. This meeting was made possible through the good work of Bro. Subodh.

Some margiis, expressing a particular interest in participating in future MV activities, signed up at the end. Bro. Raja from Singapore has been participating in MV discussion since long back. Surely many others will join later. (--MRI)

Manila Sector... Microvita Seminar, Singapore, 16 April 2006

On the 16th of April twenty five margiis from Singapore had the opportunity to attend a microvita seminar conducted by brother Bhaktaviirya from Australia. Some even took the trouble to travel all the way from Malaysia.

The seminar was well received by all. We found it interesting as the speaker related microvita to scientific discoveries and theories. He also related the topic to different systems of life, health, mind, economy, education and environment. The presentation was very informative, attractive, eye-catching and educative. The audience was amazed by the presentation that showed how extensive microvita are as they touch every sphere of life.

An interest was expressed to bring Bhaktaviirya to our regional conference in Malaysia in December to give a similar program where 400 people are expected to attend.

(Maniisha)

Re: [MRIEurope] MV seminars in Taipei and Singapore

Namaskar, Dada,

Very inspiring news. well done. great to see your talent and skills being utilized.

interesting idea you have about synthesis of east and west. i hope we can all do that in the end.

in Him, cna

Berlin Sector:

Namaskar all,

at our regional Easter conference in Madhu Karuna, we also had a 4 1/2 hour Microvita seminar, attended by 30-35 Margiis. The classes were followed by interesting discussions, touching everybody's concerns. Starting point was the 6th chapter of "MV in a nutshell" (Neo-Ethics and Multilateral Salvation). From there we considered the influence of Devayoniis and Pretayoniis on people's mind in history as well as in individual experiences. Additionally, we focused on the scientific background with special reference to quantum physics.

Brotherly in HIS love

Manohar

=====

PS: "... the East and SE Asian countries are in the best position to progress MV science. That is because they sit on the boundary between the strongest objective scientific culture in the world (i.e. USA) and the strongest spiritual culture in the world i.e. the Indian sub-continent."

But - if this would be true in all parts of the planet, Europeans should just sit down and wait ...? 😊

Baba

Namaskar to everyone,

Congratulations for making such a wonderful newsletter. Hoping to see more in the future. I just want to express to everyone that I am truly grateful for all those who arranged the seminar in Denmark Master Unit last December. It gave me a lot of inspiration and also to others who attended.

And to tell the truth, it was the first time in my whole life that i could sit for hours in a lecture which normally I could not. That means only one thing, the topics were good and interesting and they were given professionally.

in His love always,

Didi Ananda Krpa

Conference on Science and Consciousness... *A Report by Dr. Pashupati , USA*

On April 21-26 I was privileged to attend the 8th annual Conference on Science and Consciousness in Santa Fe, New Mexico. A wonderful event, full of conscious people including psychologists, therapists, psychics, artists, and even a few MD's and DO's. The attraction for me, in addition to the topic material, was Dan Millman, a gymnast, martial artist and spiritual coach who wrote "Way of the Peaceful Warrior" twenty-five years ago, and spoke at my son's graduation ceremony at Berkeley in 1998. Dan's approach was simple: Do what you feel, and keep it out of the realm of intellect. Accordingly, we did physical exercises to learn the ways of balance, softness and hardness in conflict situations. We learned about the paradox of living in the Here-and-Now, when in reality there is no such thing as Now, since all is in the blend between the present and future; and there is no such thing as Here, since we all are actually non-local beings.

Along this line, the experimental studies of William A. Tiller, Ph.D. were markedly significant. A 35-year experienced meditator, he left his position as Materials Science Professor at Stanford University in order to pursue and prove the hypothesis that there is no objective reality, and that the mere observation of events and the intent to do so, makes the events themselves change correspondingly. He made many experiments in parallel with P.R. Sarkar's microvita theory, among them:

Four experienced meditators imprinted an electronic circuit board with the intent to raise the pH of water by 1 unit (a ten-fold decrease in the concentration of hydrogen ions). The board was taken to another city, placed near a beaker of water, and lo and behold, over a period of hours, the pH did indeed gradually rise by almost exactly 1 pH unit. The experiment was repeated with the intent of lowering the pH by 1 unit (a ten-fold increase in hydrogen ion concentration), and lo and behold, there was a corresponding gradual decrease to 1 full pH unit below baseline. This change did not occur with a control sample.

A specimen of alkaline phosphatase, a liver enzyme, was found to have a 15-25% increase in activity ($p < .001$) when placed in an environment conditioned by an intention-imprinted electronic device (IIED).

Fruit fly larvae were similarly influenced to speed their development by 25% ($p < .001$) when exposed to the field of another IIED.

The space in which the experiment took place made a difference, and he found cyclic variations in water temperature and pH, which occurred only in a room that had been "conditioned" by an IIED. This effect translated to similar cyclic variations in water temperature and pH in a similarly conditioned lab over 100 feet away, and these variations did not occur in an unconditioned lab. When a large quartz crystal was placed in the area, the temperature variations changed markedly, depending on the orientation of the crystal.

These effects were found to be somewhat dependent on the enthusiasm of the experimenter.

Conditioned spaces tended to maintain their properties over a long period of time.

After doing these and other experiments, Dr. Tiller postulated an alternate space-time continuum, in which there were wave/particles which he labeled "deltrons", which communicate between our ordinary space and the space of subtle energy. Accordingly, he prefers using an 8-dimensional model of the universe rather than the 4-dimensional model currently in vogue (length, width, breadth and time). In the space of subtle energy, deltrons are not limited to the speed of light. Nor are they limited to our space-time considerations. Experiments with labs 6000 miles apart, yielded results showing "entanglement" of effects in both labs, which would not occur if ordinary geometry and quantum mechanics were the only operating principles. Deltrons are said to embody units of intelligence and intention, and can be modified and channeled by a human with a developed biofield.

Another of his principles is MASS Û ENERGY Û CONSCIOUSNESS.

He devised an equation joining the forces of the concrete reference frame and the forces of the subtle reference frame, as vectors summed up as sides of a triangle forming a hypotenuse. Hence, using Pythagoras' theorem,

$$Q_R^2 = Q_{Rx}^2 + Q_{Ry}^2$$

Where Q is the resultant vector, R is the descriptor for the reference frame, x is the frame of ordinary reality, and y is the frame of subtle energy.

This whole approach is very similar to P.R. Sarkar's description of Microvita, as unit particles of consciousness and idea, which can be positive or negative, and where the chemical formula for water can be written as $H_2O + (10,000 MV+)$.

Dr. Tiller has many publications and several books, including "Conscious Acts of Creation" and "Some Science Adventures with Real Magic." He can be accessed via www.tillerfoundation.com and is very enthusiastic about sharing his knowledge and experience. More on this subject is available in the movie "What the Bleep Do We Know", in which Dr. Tiller also appears.

One of Dr. Tiller's helpers at the conference was Stanley Jungleib, an inventor in the field of computer music recording and playback. He described and photographed photo-luminescent orbs similar to the "luminous bodies" described by P.R. Sarkar. The photography could only be done by a camera similarly charged by an intention imprinted by a local intuitive. Similar photographs using non-charged cameras yielded no pictures of similar orbs. A non-flash video captured the orbs passing through solid objects, using non-linear motion, and showing flocking behavior. He can be reached at stanley@jungleib.com.

Continued on page 7...

Neo-ethics of Multilateral Salvation ...(*from page 1*)

Similar is the case with a molecule. But it is internally more of heterogeneous character and externally more of homogenous wonts. So an atom stands with its unitary glamour according to its internal homogeneity or internal heterogeneity.

Hydrogen, sulphur and oxygen collectively form sulphuric acid. When these combine under certain temperatures and in particular barometric conditions and in specified proportions, we get the result. If one of these conditional factors varies, the result will also vary.

When there are no carbon atoms, protoplasmic structures cannot be formed. Protoplasmic cells are molecular ones of heterogeneous nature. If the nuclei of protoplasmic cells are split up, they release innumerable times more energy than a nuclear explosion does. Obviously, living bodies, being composed of countless protoplasmic cells, possess huge proportions of energy -- something which is beyond ordinary comprehension.

Billions of microvita produce a single carbon atom. That is why it cannot be said that everything comes from carbon atoms. Rather, the carbon atoms come from microvita. Not only carbon atoms, but all other kinds of atoms are the creation of microvita. Naturally, chemistry, biochemistry and all other associated branches of science will undergo a revolutionary change. A day is sure to come when an omega of mathematics will coincide with an omega of biochemistry. All formulae and theories followed up till now will have to be reformulated, redefined and reclassified.

Since an atom does not come within the range of an ordinary microscope or an ordinary telescope, how can microvita -- which are innumerable-times more subtle and smaller than atoms -- come within the scope of an ordinary microscope, an ordinary telescope, or ordinary perception in the psychic sphere, or also of inferences?

Each structure of carbonic origin in this universe, whether animate or inanimate, has a mind. That is, a mind is associated with every structure either in manifested form or in dormant form. Where the mind is not expressed there is no endoplasmic coverage, and where the mind is expressed, endoplasmic coverage shall be there. Wherever there is mind, it must require pabula of both carbonic and non-carbonic nature. When psychic pabulum is of carbonic nature psychic movement is towards the crude, and if psychic pabulum is of non-carbonic nature, psychic movement is towards subtlety. Non-carbonic, psychic pabulum helps in spiritual and supra-psychic motivation. A genuine spiritual aspirant must be very careful in selecting his or her food. Pabula of carbonic nature help in maintaining and nourishing the physical structure, and pabula of non-carbonic nature help in strengthening the psychic structure. An intake of more and more defective carbonic pabula adversely affects the psychic triangle of forces, and thus hinders one's psycho-spiritual progress. A stage may come when the physical structure becomes almost mindless. The mythological fable of Ahalya' (who was turned into stone for a sin she committed in the epic Ra'ma'yana) may be cited as a case in point.

When people get detached from non-carbonic pabula and become increasingly engrossed in carbonic pabula, there are two ill-effects as a consequence. First, the arena of one's own carbonic pabula will increase and the mind will gradually and steadily drift towards crude matter. Secondly, one's mind will think in terms of devouring other's carbonic pabula. This is the psychological explanation of imperialism. That is, imperialism has its origin in the psyche and functions in the psychic arena. When expressed externally it takes various forms, such as capitalism, state capitalism, communism, nationalism, communalism, parochialism, provincialism, socialism, caste-imperialism, male chauvinism, lingualism, (Once I went to a big village where the people's language was Bengali, but even in the primary school Hindi was taught there substituting the mother-language. It is a glaring example of lingual imperialism.) etc., which are all the same psychic ailments in various forms and figures.

Goaded by this psychic ailment, a superpower forces its own selfish national interests on other weaker states to establish its suzerainty politically, militarily, etc. An imperialist power wants to dominate and exploit other socio-politico-economic units as an expansion, perpetration and consolidation of its vested interests; a powerful linguistic group suppresses other minority linguistic groups; the so-called upper castes subjugate the so-called lower castes in society and suck their vital juice under so many pleas and disguises; and opportunistic males curtail the rights of women in various ways. In all these cases, the same inherent psychological malady of imperialism prevails.

Imperialism is anti-human. It runs counter to the spirit of Neo- humanism and the ethics of human life. It is detrimental to prama' sam'vrdhhi, prama' rddhi and prama' siddhi in human society. In a word, it thwarts human progress and creates global wars and all sorts of divisive and destructive forces in society.

Imperialism is a negative force, a destructive phenomenon, which generates exploitative and unjust conditions in individual and collective life. Such a poisonous radiation of black force attracts negative forces like negative microvita. Those negative microvita intensify and escalate the demonic activities of imperialism in all aspects of human society -- art, literature, education, trade, commerce, industry, agriculture, morality and social relations. They cultivate a psychology based on slavery, inferiority complex, pseudo-culture and psycho-economic exploitation, and in certain cases are the cause of nihilism and cynicism.

In order to wipe out imperialism, which is rooted deep in the human psyche Neo-ethics based on the following points is indispensable:

- 1) The Macrocosmic Entity must be accepted as the supreme desideratum in human life.
- 2) There should be happy adjustment and balanced blending between carbonic and non-carbonic pabula.

Positive Microvita in the Forests of Ananda Vrati.....*Ac. Vimalleshananda Avt.*

Are there positive Microvita in a master unit ? For sure!

It all started one morning in Ananda Vrati Master Unit.

"I should carve some stones with Shrii Sarkar's quotations and put them at the feet of the trees!"

What a crazy idea, still ... why not?

I asked a Master Unit resident how to find carving tools and he suggested to look for one tool shop in Scranton, PA. I phoned and they didn't have the right tools. I had my first set back ... still I trusted the positive Microvita and that there should be some alternative ways to get the stones carved. I started to call mortuaries and one of them agreed to help me out. I collected few stones from the ground and I took off. I had all my luggage with me and along the way after a couple of phone calls I decided to travel to Washington DC. There in Home Depot I found the tools I was looking for and I started the work with the stones. Dada Vimalananda gave me a couple of short Baba's quotes and in few minutes the stones were vibrating with Shrii Sarkar's words. It was encouraging. I showed the opera prima in New York Sectorial office and more appreciation came. I was now ready to start the project as soon as I was back in Ananda Vrati.

Once there I went into the woods and I placed the first stones with quotes. More ideas started to flow ... let us give a name to the forest ... let us call it Spirit Forest.

One of the little secrets of Ananda Vrati is that there is a wonderful collection of books on different types of subjects related to education, outdoor, adventure, sports, games etc.

I got attracted by one which is named ... the Virtue Project. By chance I found some cards related to the books. There were 52 virtues for 52 cards with name and description. I started to play with them. There was one with the name ... steadfastness. Actually I didn't know what it means so I read the explanation. Interesting enough I found myself completely lacking of that virtue ... ok, I will complete this project no matter what, this is the meaning of steadfastness. The second forest came to live and it was called ... the Virtue Forest.

Early morning I decided to start the operation. I moved the garden tables to accommodate the tools, placed the cordless phone, gathered the computer to listen to the Prabhat Samgiita songs, displayed the cards and then ... the hardest job ... collect 52 smooth stones. Actually in Ananda Vrati there are plenty stones of a quality called blue stone that is the material used for landscaping and external pavements. All around the area it is possible to see beautiful dry stone walls made with this special type of stone. Still 52 good stones... find them, carry them... it took me a while and some sweat.

I started to carve the virtues, first the short ones ... love, tact, mercy, trust, unity, etc. By midday I was completely exhausted but 21 virtues had been already produced, at least on stone.

One forest, two forests, but what about the main forest, the one we used for the obstacle course? Let us call it the Cakra Forest. I went there and ... unbelievable; there was a series of big tall trees all in one line. These are the cakras! I can set the stones around the biggest ones with all the names of the propensities. I really got excited and doubled my efforts. Let Ananda Vrati be a place where everybody can meditate on our ideology just by walking in the forest. Besides that we will have to take care of it and maintain it clean. Who could think that stones may have so much value?

One forest, two forests, three forests ... but what about the 15 shiilas? Is there a forest available for them? Of course there is, and the first carved stones are already in place. Now there is still some difficult for the longest shiilas ... I don't want to write a poem on a stone. Some adjustment will be there and some shiilas will be reduced to one or two meaningful words. Well, it is time to sleep. I think it is enough work for today. Ananda Vrati has now more meaning and its Microvita are still there waiting to be useful to those spiritually inclined minds who wish to come and spend some time in its surroundings.

The latest forest that has been named, has been the Microvita Forest. It is where there is the greatest amount of water and the vegetation is lush and musky covered. Also the two apple trees in front of the house have received the name of Yama and Niyama. Ten stones have been placed around them with the names in

Samskrta. The beautiful trees nearby has been named Dharma, Bhakti, Karma and Tantra. I just collected few good stones for the Spirit Forest where there is still scope to add some quotation of Shrii Sarkar. A big stone has been placed at the entrance of the Master Unit with its name "Ananda Vrati" and the date of its establishment 1990. There is a small cemetery in Ananda Vrati that very few people know about it. I cleared the path and I put a stone as "Deer Path" as the deer like to walk on that trail up to the next property. I don't know if this is the effect of the positive Microvita but I feel love for this place and any small natural event become a wonder inside me. I saw the groundhogs eating on the lawn and I heard so many terrible stories about them. How they destroy the garden and eat all the vegetables ... when I saw them I could feel

only the innocence of those furry little creatures. May they live unhurt on this land! There are several wild animals that seem to like the Master Unit: deer of course but also rabbits, mice, and even a small red lizard. There is a fee-bee bird which did the nest under the deck at the entrance of the main building. Every time that I go out, she leave the nest and fly on the branch of the "Dharma" tree. She complains a little bit and when I go inside she is back in her nest. I consider them as residents of Ananda Vrati. (...Page 6)

Neo-Ethics of Multilateral Salvation... P. R. Sarkar

This is the Neo-ethics of the present age; a panacea for the present imperialistic social ills and a mesh of psychic disorders. The application of Neo-ethics will lead to multilateral salvation of human society by removing economic exploitation, political suppression, religious indoctrination, cultural imposition and social subordination.

The Role of Guru

I have already said that if there is a happy adjustment and balanced blending between carbonic and non-carbonic pabula in the human mind and corpora, there will be no imperialism at all. Rather, heaven will descend on the dusty earth.

While following the path of Neo-ethics, human beings will attain enormous progress in the spiritual sphere with greater speed. With the help of non-carbonic pabula they will sharpen their psychic penetration within inter- and intraatomic and molecular space. With the help of microvita they will be able to powder down their ectoplasms and transform them into cognitive faculto-factors.

The majority of people today do not know the technique of using microvita. The Universal Entity, sitting in one place, has been using microvita to accelerate the spiritual growth of individuals in different celestial bodies in different ways. Only that Supreme Entity who is conversant with these techniques and can teach them to individual spiritual aspirants is the Supreme Guru. He keeps all within His contact, and with the help of microvita, elevates all spiritually.

Living beings, through their own individual efforts, can achieve only a little progress in the carbonic world, but in the non-carbonic world only the grace of the Supreme Guru can lead them towards the supreme goal.

Hence, it has been rightly said, "Gurukrpa ' hi Kevalam" . "The Guru's grace is everything."

This alone is the supreme truth. This is the be-all and end-all of life.

26 March 1987, Calcutta

Mv. FOREST...(from Page 5)

I remember when I visited a hermit couple. It was in the deepest forest and when I reached there the small flowers on the lawn were waving gently as a welcome. Again the same when I was leaving ... just a case?

The hermit told me that it was not for chance, it was their way to greet me.

May the Positive Microvita greet you when you next visit Ananda Vrati.

Photo Ac. Vimalashananda Avt.

Response Awaited... (MRI?)

Dear All, Namaskar

I got a question on the term sidereal year which is mentioned in one of Bábás discourses (14th April 1988, Calcutta) Herein he states: "So that human beings absorb only their beneficial effects and advance by avoiding their negative effects, they must be aware of and understand their cyclic order. This cyclic order is known as "sidereal year" [...] Human beings must always try and adjust their own microcosm with the Macrocosmic blendings."

Is this related to astrology? Does this mean that it is different for every individual or does it go with the collective flow? How can you find out what the constellation is and how can u deal best with it?

Looking forward to hear from you.

His,

Ashok (Alexander Kopetzky), ashok@gurukul.edu

=====

NB: Topic to be covered in the upcoming workshops in Denmark Dec. 28-30, 2006...MRI.

Science and Consciousness ... (from page 3)

Other presenters in the conference included Cleve Backster, a polygraph expert, who found that plants reacted measurably to people's intentions and emotions. Once the plant had several interactions with the person, these reactions were evinced even when the plant was miles away from the emotional person. Yogurt containing live bacteria had similar responses on galvanic skin response and other measurements. Featured in "The Secret Life of Plants," he has published his own book called "Primary Perception – Bio-communication with Plants, Living Foods and Humans Cells." <http://www.primaryperception.com/>

In the field of negative Microvita, Dr. David Ray Griffin presented evidence for demonic consciousness as an emergent reality. He proposed the theory that the 9/11 attacks were a deliberate, "false-flag" maneuver on the part of our Administration. This would provide popular support for a military-industrial buildup, leading to U.S. hegemony in a world economy, which would be attractive to many of our political leaders who live off oil profits. Dr. Konstantin Korotkov from Russia developed a device to measure electrically stimulated photonic emissions from people's fingers or drops of water. Experiments on humans showed early detection of disease, and post-mortem experiments showed dramatic differences between people who had died a natural death and those who had died an emotionally traumatic death. He was also able to demonstrate differences in emissions from ordinary city water and pure mountaintop rainwater. His measuring device is now in common use in Russia. He may be contacted at www.korotkov.org.

Many other presenters described scientific bases and measurable effects of various phenomena, including crop circles, remote viewing, and clairvoyance. Most had interesting stories about their efforts in gaining acceptance by the traditional scientific community for the evidence that they had gathered.

All in all, it was a most unusual and exciting conference.

Best wishes,

Pashupati (Steve Landau MD)

Pashupati@anandamargaraigh.org

Interesting topic for further reading : http://www.wnrf.org/cms/microvita_body.shtml#_edn14

EVENTS :

- Understanding Microvita
Venue: Singapore Regional Retreat, December 15-19, '06
- Face to Face with Mv. of all Kinds — Part II
Venue : Denmark, Arrival: Dec.27 –30, '06
- International Microvita Research Conference
Venue: Denmark
Date: Mid May 2007.

The Making of A Microvita Scientist :

"I think, by dint of our spiritual sa'dhana', rather our physico-psycho-spiritual sa'dhana', our minds will develop in all strata, and the power of conception, the power of conceiving, will also develop, and with that developed conceiving power, we will know all the secrets of these Microvita."

— *Shrii P.R. Sarkar*, December 31, 1986, Kolkata (India)

Microvita Research

Research, Study, Publicize and Apply the Knowledge of Microvita (Mv.) Science for Service and Beatitude.

MRI invites standard logo designs to be used by all its branches globally. Suggestions and samples are all welcome !

Vision :

- Create 'momentum' for Mv research
- Identification and initiation of Mv research areas
- Foster research and publication of papers
- Establishment of core group of Mv researchers to coordinate communication within marga community i.e. internal and external
- Attracting the public to Mv research e.g. via RU magazine
- MRI web-page to support exposure of Mv research, its associated Institute and Gurukula to public via web-page that includes a Mv discussion forum
- Presentation of Mv concept in 2006 at international conference e.g. Conference on Science & Consciousness or ISSSEEM (subtle energy research with focus on healing)
- Prospect for 1st International Mv meeting in 2007 to report on study and results on Mv research. Location: possibly in Europe, meeting taken under consideration
- Training Gurukula students in Mv concepts
- Production of Gurukula teaching materials
